Foreword

This report continues the annual release of Medicare enrollment figures begun with data for 1966. The number of persons insured under the two parts of the Health Insurance for the Aged program — hospital insurance and supplementary medical insurance — are shown primarily for July 1, 1971, by age, race, and sex, and by place of residence. Monthly new enrollments, chiefly the result of reaching age 65, and the monthly terminations, chiefly through death, are also shown. Selected data are included for enrollment since the program began. The figures will provide the population base for rates of utilization of medical services covered under the program and planned for publication in other reports of the annual Medicare series.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, director, and Aaron Krute, deputy director. This report was the responsibility of Martin Ruther, Program Statistics Branch. Important contributions for the tabulation and presentation of the statistical content were made by Theodosia P. Rasberry, Robert J. Butler, and Joyce B. Ragin. Computer services were provided by the Division of Health Insurance Statistical Data, Bureau of Data Processing. The General Tables were produced by the "System for Automated Tabular Composition," a computer system at the Social Security Administration headquarters. They were photo typeset on Linotron equipment at the Government Printing Office.

THIS PUBLICATION is a section of a statistical report series produced from Medicare program records. Presented on a calendar year basis, describing services rendered in the year, the series includes sections on enrollment, characteristics of providers, inpatient hospital care, outpatient hospital services, home health services, physicians' and other medical services, and overall summaries.

The primary objective of these reports is to provide data required to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, extended care facilities, home health agencies, and independent laboratories to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the program services utilized and the demographic characteristics of each individual recorded in the health insurance entitlement master file.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available data. First, data are collected and maintained on an individual basis so that the beneficiary and his medical experience under the program form the basic unit. Second, records for each bill paid under the program and, for a sample of beneficiaries, records of diagnoses and surgical procedures are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are centrally prepared.

THE BASIC RECORDS

The statistical system is based on five related computer-tape records: the health insurance entitlement master file, provider record, hospital insurance (part A) utilization record, medical insurance (part B) payment record, and the record containing information from medical insurance bills for a 5-percent sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE ENTITLEMENT MASTER FILE

The health insurance entitlement master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital benefits, to supplementary medical insurance benefits, or to both of these benefits.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program and therefore serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, extended care facility, and independent laboratory must apply for participation in the hospital insurance program in order to be reimbursed for services provided. Data included on the application forms have been recorded in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he had used the benefits available to him under the "benefit period" concept.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration for recording in the central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days remaining during the "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When approval for payment has been made, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Copies of admission and billing forms are handled in a comparable manner by home health agencies and extended care facilities. The outpatient billing form is also transmitted to the Social Security Administration for recording in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and extended care facilities that is needed to administer the "benefit period" provision is recorded in the central record. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or extended care facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting tape record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to part A utilization.

PAYMENT FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills having allowed charges exceeding $50 during a calendar year period.

For the insured population, carriers need to know from a central source that the deductible has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable record of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw additional samples designed to obtain specific information not furnished reliably by the basic sample of enrolled persons under the medical insurance program.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data and a sampling frame for efficiently drawing additional samples of bills, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of all enrolled persons. Intermediaries have been given specific combinations of digits of the health insurance claim number to be used in selecting the 5-percent sample, which is a sub-sample of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physicians's billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for the specific service.

All of the bills of persons in the 5-percent sample to or for whom payment is made under the program, including those used to meet the annual $50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the $50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.[1]

For hospital-based physicians who have authorized the provider to collect the fee for their services, the provider billing for patient services by physicians form is used. This form is completed for each patient. It includes descriptive information on the date and place of each service, the diagnoses, procedures, and the charges. These bills are received centrally for the 5-percent sample of persons enrolled for supplementary medical insurance.

Characteristics of the Enrolled Population, 1971

On July 1, 1971, 20.9 million persons aged 65 and over were insured under Medicare. Included were 19.8 million persons covered by both hospital (HI) and supplementary medical insurance (SMI); an added 940,000 persons entitled only to HI benefits; and about 170,000 protected only by SMI (table A). This report presents data on the characteristics of the population in the Medicare program in 1971, and discusses changes in enrollment since the start of the program on July 1, 1966. The general tables present data by type of coverage and age, race, sex and by State and county of residence. Most of the counts of enrollees refer to July 1, 1971, to provide a population base for measures of utilization of medical care services under the Medicare program. Also included are tables showing enrollment by month, and the total number of persons enrolled at any time during 1971.

During the 5-year period from 1966 to 1971, HI enrollment increased 8.7 percent (from 19.1 million to 20.7 million) reflecting the growth of the population aged 65 and over. Almost every aged person is eligible for HI, but enrollment in the SMI program is voluntary and the enrollee is required to pay a premium. There were 20.0 million SMI enrollees on July 1, 1971, or 12.6 percent more than when the program began. The number of persons entitled only to HI benefits decreased from 1968 to 1970 and then went up in 1971. This rise may have been caused by an increasing number of persons entitled to HI but ineligible for SMI because of the 3-year enrollment or reenrollment limit (see Provisions of the Law). The 1972 Amendments (Public Law 92-603) eliminated this provision of the law and provides new opportunities for persons formerly ineligible for SMI to enroll.

HI Enrollment

Type of entitlement.—Persons enrolled in the HI program may be described by the characteristics recorded in the Health Insurance Entitlement (HIE) master file—age, race, sex, place of residence, and type of entitlement. About 92 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table B), and 4 percent were receiving or were entitled to railroad retirement benefits. Some 304,000 persons were entitled to both social security and railroad retirement cash benefits because of earnings under both programs. These persons are reported both

as entitled to social security benefits and as entitled to railroad retirement benefits, but are counted only once in the figures in table B for all enrolled persons. The balance of the enrolled population (5 percent) were not entitled to receive cash benefits under either social security or railroad retirement. This group is entitled to HI coverage under the transitional provision of the law. Under this provision, persons attaining age 65 need not be fully insured for social security but must have a specified number of quarters of covered employment to be eligible for HI. For persons who attained their 65th birthday before 1968, no quarters of coverage were required; in 1968, 3 quarters; in 1969, 6; in 1970, 9; and in 1971, 12. By 1974 for women and 1975 for men, the HI transitional provision will no longer apply since the same number of quarters of coverage will be required for entitlement to cash retirement benefits and HI benefits.

See footnote at end of table

The number of persons classified as "other enrolled persons" in table B declined from 2.6 million on July 1, 1966 to 1.5 million on July 1, 1967, because of the transfer of persons who benefited from Public Law 89-368 (the Prouty Amendment) from the category "other enrolled persons" to "persons entitled to social security benefits". Under this provision of the law, effective October 1966, persons aged 72 or older before 1968 are entitled to a monthly cash benefit even though they earned no work credits. Persons attaining 72 years of age in 1968, 1969, 1970, and 1971 were required to have earned at least 3, 6, 9, and 12 calendar quarters of work credits respectively, to obtain cash benefits.

Since 1967, the number of "other enrolled persons" has decreased steadily to 1.1 million on July 1, 1971. This decline among other enrolled persons resulted primarily from deaths among other enrolled persons exceeding the number of new enrollments in this group. These newly enrolled must qualify by acquiring a greater number of work credits each year beginning with those who attained age 65 in 1968.

Except for the proportion of persons with race not reported, there were only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table B). Race was not reported for 11 percent of the railroad retirement beneficiaries in contrast to 1 percent for social security beneficiaries. Persons classified as "other enrolled", however, had a relatively high proportion (73 percent) of women, of persons 80 years and over (33 percent) and of persons reported as members of "all other races" (18 percent).

Age, race, sex.—There were more women enrolled in HI than men at every age and the ratio of women to men increased with advancing age because of their greater longevity (table B). At ages 65-66, 54 percent of the HI population were women. This proportion rose to 66 percent at ages 85 and over. The rising proportion of

[1] Persons entitled to social security and railroad retirement cash benefits (304,000) are counted separately but only once in total.

women to men with advancing age was similar for both the white population and among those of all other races. The group for whom race was not reported contained a much higher proportion of women (73 percent) than the total HI population (58 percent). Among those without a race designation, at ages 65-66, 53 percent were women but this figure rose steeply to 88 percent at ages 85 and over (table B). Persons classified race unknown combined disparate elements (see Race unknown).

The median age of the white population was slightly higher (0.6 years) than that for all other races. The greater longevity of women raised the median age of women only 1.1 years above that of men. By race, 90 percent of the enrolled population was classified as white; 8 percent as all other races; and for 2 percent race was not reported:

Race and sex	Persons enrolled in HI (in thousands)	Percent	Median age (in years)
Total HI enrollees	20,742	100.0	73.1
Men	8,628	41.6	72.5
Women	12,114	58.4	73.6
White	18,582	89.6	73.1
Men	7,751	37.4	72.6
Women	10,830	52.2	73.5
All other races	1,672	8.1	72.5
Men	745	3.6	72.0
Women	926	4.5	73.0
Race unknown	489	2.4	76.9
Men	131	.6	71.3
Women	358	1.7	79.1

Geographic distribution.—For the HI population, the most populous region was the South (30 percent) while the West had the smallest proportion (16 percent) of HI enrollees (table C). By division, the greatest proportion of the HI population resided in the Middle Atlantic and the East North Central States, with each having nearly 20 percent of all HI enrollees. The Mountain States had the smallest percentage of HI enrollees (4 percent). The same distribution held for the white population, but for persons of all other races, almost 60 percent lived in the South.

With the exception of the South, the proportion of whites exceeded 91 percent of total HI enrollees in all geographic divisions. In the three divisions of the South, the white population accounted for between 79 and 84 percent of HI enrollees.

Two-thirds of the persons covered by hospital insurance were living in a metropolitan county. The percentage distribution by region and division for 1971 is:

Region and division	All persons	Metropolitan counties		Non-metropolitan counties
		With central city	Without central city	
United States	100.0	53.5	12.6	33.8
Northeastern States	100.0	59.6	23.5	16.8
New England	100.0	55.4	22.9	21.7

[1] Includes race unknown, not shown separately.

The proportion of those living in metropolitan counties showed much variation by geographic area. Nearly half the population of the South lived in nonmetropolitan counties while in the Northeast less than 20 percent of the population lived in counties of this type. Three-quarters of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a population of 500,000 or more in 1970 (table 2.4).

SMI Enrollment

Age, race, and sex.—There was little difference in the distribution by race, sex, and median age of persons enrolled under the HI and the SMI program. This is to be expected since the proportion of HI enrollees also participating in SMI was 95 percent (table D). When Medicare began, only a small number of persons were eligible for SMI but not for HI (table A). The number of SMI enrollees expressed as a proportion of the number of HI enrollees, therefore, provided an adequate measure of participation in the voluntary part of the program. However, as the number of persons enrolled in SMI but not eligible for HI increased, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage.

The largest difference in the proportion of the HI population also enrolled in SMI was between races. For the white population, 96 percent of the persons enrolled for HI were also enrolled for SMI, about 6 percentage points more than for all other races. The excess for whites persisted in every age and sex group and was greatest by 2-year age groups for those aged 65-66 and by 5-year age groups for those aged 65-69. The percentage of HI enrollees also covered by SMI varied only slightly with sex, the participation of women being greater than that of men by about one percentage point. For 2-year age groups between 65 and 75, the lowest proportion was recorded for men at ages 65 and 66. It is likely that many men on attaining age 65 do not enroll for SMI because they are protected by employment-related medical insurance. By 5-year age groups the lowest and highest participation rates differed by only 1 percentage point.

Geographic distribution.—On July 1, 1971, among HI enrollees residing in the United States 97 percent were also enrolled in SMI (table E), or 1 percentage point higher than for all persons covered by HI. The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas such as Puerto Rico (see table 2.1) and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. Participation rates were much lower than the U.S. average in every outlying area. Factors such as lower incomes and differing arrangements for medical care in these areas probably account for the lower enrollment.

For all persons in the United States, the percent of HI enrollees with SMI benefit coverage varied only about 1 percentage point among the divisions, from 96 percent in the West South Central States to 97 percent in the New England States. Among all other races this proportion varied by 11 percentage points from 84 percent in the Mountain States to 95 percent in the Pacific States. There was no difference in the proportion of HI enrollees with SMI coverage (97 percent) according to metropolitan — nonmetropolitan county of residence.

Persons Newly Enrolled and Persons Terminated in 1971

A total of 1,490,000 persons was newly enrolled under HI during 1971 (table F), an average of 124,000 a month. Nearly all additions to the rolls were persons who had just attained age 65. The provisions of the law for HI coverage also permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. Additions to the SMI program totaled 1,585,000 persons, exceeding the number of those newly enrolled for HI by 95,000 persons. Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons in SMI who are ineligible for HI coverage.

The general enrollment period.—Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods (see Provisions of the Law). In the general enrollment period (GEP) which ran from January 1, 1971 to April 1, 1971 over 290,000 persons were identified as eligible to enroll. Almost 120,000 chose to do so with enrollment taking effect on July 1, 1971.

The premium paid by persons enrolling for SMI was $5.60 a month on July 1, 1971. In addition, the monthly premium of persons who do not sign up in their initial enrollment period is increased by 10 percent for each full 12 months in which they could have but did not enroll. The increase also applies to persons re-enrolling 12 or more months after their first coverage was terminated. About 63 percent of those who enrolled during the 1971 GEP were subject to a 10 to 40 percent surcharge, or premium payments ranging from $6.20 to $7.80 a month.

"SMI only" enrollees.—The second group adding to SMI enrollment are those persons ineligible for HI coverage. There were 170,000 such persons on July 1, 1971, an increase of 43,000 persons since July 1, 1970. They were persons who lacked the required work credits for HI eligibility, estimated to number 145,000, and about 25,000 Federal employees insured under the Federal Health Benefits Act of 1959, who may pay the premium to enroll for SMI but who are not entitled to HI. As expected, enrollees eligible only for SMI differed considerably from those protected by both parts of Medicare. "SMI only" eligibles are mainly new enrollees who lacked the work credit requirement that began for those reaching age 65 in 1968 or later. Thus, 96 percent of those eligible only for SMI were less than 75 years of age compared to 60 percent of those covered by both programs. Because women are more likely to lack the work credit requirement they comprised almost 70 percent of SMI only eligibles while they were 60 percent of those covered by both programs. By race, SMI only eligibles contained higher proportions of persons of all other races, 13 percent, and persons classified race unknown, 12 percent; for those having both HI and SMI coverage the proportions were 8 and 2 percent, respectively. The distribution of enrollees eligible only for SMI by age, race, and sex is:

[In thousands]

Race and sex	Aged 65 and over	65, 66	67,68	69, 70	65-69	70-74	75 and over

Men	5	2	2	-	4	1	-
Women . . .	16	8	6	-	14	1	1

State "buy-in" agreements.—The third group adding to the rise in SMI enrollment resulted from the "buy-in" provisions of the law. At the start of Medicare, 22 states elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90-248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed by-in agreements for particular categories to public assistance. No additional States or areas were added to the buy-in rolls during 1971 (table G). However, Utah joined six States that extended buy-in coverage to aged "medical indigents" eligible for medical assistance (Title 19). The medically indigent have income and assets larger than that required for public assistance but inadequate to pay their medical expenses. Excluded from table G (but shown in earlier years of this series) were 19 States with agreements permitting them to cover medical indigents but who have not done so. By the close of 1971, nearly 2.4 million or 12 percent of all SMI enrollees, were enrolled in the program under State buy-in agreements (table H). The highest proportions of

[1] PA recipients entitled to OASDHI and RRB were covered under State "buy-in" agreements, except in Mass. and Wis. Coverage was effective July 1, 1966, except in Cal. and Guam where coverage of beneficiaries began Jan. 1, 1967, and July 1, 1968, respectively.

[2] Definition of title number: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind, or disabled.

[3] Title 4 covered in Ark. effective Jan. 1, 1970; Fla., Feb. 1, 1970; Maine, April 1, 1968; and Okla., Nov. 1, 1967.

[4] Titles 4, 10, and 14 covered in Del. effective May 1, 1968; Iowa, July 1, 1967; N.J., Jan. 1, 1970; S.D., Jan. 1, 1968; Tenn., Dec. 1, 1969; Va., Sept. 1, 1969; and Wis., Apr. 1, 1968.

[5] Nevada does not have a title 14 program.

buy-ins in the U.S. were in six southern States: Mississippi, Alabama, Georgia, Arkansas, Texas and Oklahoma. These States each paid premiums for one-quarter or more of their SMI enrollees.

Persons terminated.—During 1971, HI coverage was terminated for 1.2 million persons who died (table J). Since termination of coverage occurs in the month after death, terminations in 1971 include deaths in the months of December 1970 through November 1971.

In calendar year 1971, 1,205,000 deaths were recorded among Medicare (HI and/or SMI) enrollees. Owing to differences in the population covered, and in the sources of the report of age at death, as well as delays in recording deaths in the Social Security Administration's file, these figures do not correspond exactly to data on deaths published by the National Center for Health Statistics.

About 1,195,000 persons were terminated from SMI in 1971, 97 percent as a result of death. Only 41,000 of the 20.0 million persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. While over 97 percent of the terminations for white persons were a result of death, 91 percent of the terminations for all other races resulted from death and the remaining 9 percent withdrew.

Enrollment Growth, 1966-1971

Both HI and SMI enrollment have increased in each of the 5 years of the Medicare program. Enrollment in the HI program grew from 19.1 million in 1966 to 20.7 million in 1971, because persons aging into the program exceeded enrollees that died. SMI enrollment grew from 17.7 million in 1966 to 20.0 million in 1971. Nearly all persons 65 years and over are entitled to HI, while persons voluntarily enroll for SMI and must pay a premium. These factors account for differences in the size and the rate of growth of the two programs. Annual increases in HI enrollment ranged from 1 to 2 percent (table K), while for SMI enrollment increases ranged from 1 to 5 percent (table L). The jump in SMI enrollment from 1 percent between 1966 and 1967 to 5 percent between 1967 and 1968 was caused by the first general enrollment period which took effect on July 1, 1968. Since then, SMI enrollment has increased by 2 percent annually.

Hospital insurance.—Because women live longer than men, the sex characteristics of the Medicare population changed slightly in the first 5 years of the program. Between 1966 and 1971 the increase of HI enrollees was greater for women (11 percent) than for men (6

Table H.—Persons enrolled for medical insurance at any time during 1971 under State "buy-in" agreements and percent of persons ever enrolled for medical insurance, by State of residence

[1] Based on data recorded as of August 26, 1972. State of residence is not necessarily the State that bought coverage.

Table J.—Persons whose health insurance was terminated during 1971 by race, sex, and reason for termination

Race and sex	Terminated by death			Other supplementary medical insurance terminations
	Hospital and/or medical insurance	Hospital insurance	Supplementary medical insurance	
All persons	1,201,820	1,197,255	1,154,141	41,336
Men	613,365	611,236	585,654	20,341
Women	588,455	586,019	568,487	20,995
White	1,066,888	1,063,472	1,027,884	30,197
Men	552,325	550,635	529,538	15,215
Women	514,563	512,837	498,346	14,982
All other races	96,679	96,041	89,816	8,409
Men	51,052	50,826	46,773	4,393
Women	45,627	45,215	43,043	4,016
Race unknown	38,253	37,742	36,441	2,730
Men	9,988	9,775	9,343	733
Women	28,265	27,967	27,098	1,997

percent). As a result, the proportion of women to total enrollees increased slightly, as shown below:

Year	Men	Women
1966	42.6	57.4
1967	42.3	57.7
1968	42.1	58.0
1969	42.0	58.0
1970	41.8	58.2
1971	41.6	58.4

The growth of HI enrollees 75 years and over in the 5-year period (17 percent) was much greater than that of persons 65 to 74 years old (4 percent). This raised the proportion of persons aged 75 and over to the total HI population from 37 percent in 1966 to 40 percent in 1971:

Year	65-74	75 and over
1966	62.8	37.2
1967	62.2	37.8
1968	61.5	38.5
1969	60.9	39.1
1970	60.5	39.5
1971	60.1	39.9

In the first 5 years of the program among those 75 years and over, the increase in HI enrollment of women (21 percent) was nearly double that of men.

Enrollment among persons of all other races increased at a faster rate than among whites, thus raising the ratio of persons of all other races to total enrollment slightly. The percentage distribution of HI enrollment by race follows:

Year	All persons	White	All other races	Race unknown
1966	100.0	89.3	7.6	3.1
1967	100.0	89.2	7.7	3.1
1968	100.0	89.2	7.7	3.1
1969	100.0	89.2	7.8	3.0
1970	100.0	89.3	7.9	2.8
1971	100.0	89.6	8.1	2.4

The greater longevity of women was again evident as the increase in enrollment among women was much larger than that of men for both white persons and those of all other races.

Changes in enrollment by geographic region depend not only on the number of persons aging into the program and the number of deaths among those aged 65 and over, but also on interstate migration of Medicare enrollees. About 1 percent of all persons 65 years and over migrate between States in a year, chiefly from the Northeast and North Central States to the South.[1]

All four regions showed annual increases from 1966 to 1971 in the number of persons entitled to HI benefits. The South had the largest numerical growth (745,000) and the highest relative increase (14 percent). Next was the West with an enrollment gain of 350,000 or 12 percent. The North Central and Northeastern States had smaller increases, 4.8 percent and 4.5 percent respectively. These differences in enrollment growth during the period reported raised the South above the North Central States as the most populous region among persons aged 65 and over beginning in 1968.

Enrollment increased also in each of the 50 States between 1966 and 1971. The largest 5-year numerical

[1] Enrollment is as of October 1.

rise was in Florida (234,000), and accounted for nearly one-third of the growth of enrollment in the South. Much of Florida's growth probably came from the migration of the elderly from the Northeast and North Central States.[2] The States with the largest relative 5-year growth in HI enrollment were Nevada, 34 percent, Arizona, 33 percent, and Florida, 31 percent, while the smallest were Iowa, 3 percent, and Massachusetts, 2 percent. The District of Columbia had a 2 percent decline in enrollment probably caused by the migration of the elderly.[2] The Bureau of the Census also reported that for all persons 65 years and over the District of Columbia had a net outmigration between 1965 and 1970.[3] A distribution of percentage changes in enrollment between 1966 and 1971 for the 50 States and the District of Columbia are shown below:

Percentage change in enrollment, 1966-1971	Number of States[1]	
	Hospital insurance	Supplementary medical insurance
Total	51	51

[1] SMSA's with more than 10,000 migrants 65 years and over as measured by the 1960 and 1970 Censuses.

Source: Donald E. Starsinic "Geographic and Age Differentials in Population Growth, 1960-70" U.S. Bureau of the Census, Proceedings of the 14th National Meeting of the Public Health Conference on Records and Statistics (in press).

Migration of persons 65 and over may be seen by comparing enrollment in SMSA's that, according to the Bureau of the Census, have experienced large net in-migration or out-migration between the 1960 and 1970 Censuses. The migration of persons 65 years and over to metropolitan resort or retirement areas as reported by the Bureau of the Census is reflected in the large increases (15 to 44 percent) in HI enrollment between 1966 and 1971 in the nine areas in Arizona, California, and Florida shown below. Enrollment in SMSA's with sizeable out-migration indicates that the movement of migrants is from large metropolitan areas in the North. In 5 years, changes in HI enrollment varied from minus 2 percent to plus 6 percent in the 12 SMSA's with the largest out-migration according to the Bureau of the Census.

All of the increase in the HI population between 1966 and 1971 occurred in metropolitan counties. The older population in nonmetropolitan counties fell slightly because some nonmetropolitan counties became metropolitan (table K).

Changes in SMI enrollment.—The increase in enrollment in SMI for the 1966-71 period was nearly 1 1/2 times greater than for HI. As a result the proportion of the HI population also enrolled in SMI increased from 92.8 percent in 1966 to 95.5 percent in 1971 (table M). This ratio declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969 but has remained unchanged at 95.5 percent since then.

When Medicare began, the proportion of the HI population also enrolled in SMI was 93.4 percent among

Table M.—Percent of persons in the hospital insurance program participating in the medical insurance program, by age, sex, race and area of residence, 1966-1971

[1] Consists of 50 States, District of Columbia, and residence unknown.

white persons and 87.4 percent among persons of all other races or a difference of 6.0 percentage points (table M). In 1967, SMI enrollment among whites increased while enrollment for all other races fell. As a result the difference in the proportion of the HI population also enrolled in SMI widened to 9.5 percentage points. Since then the growth of SMI enrollment among all other races has exceeded that of whites, so that the difference in participation rates by race has narrowed to less than 6 percentage points.

Regional differences in the proportion of HI enrollees also participating in SMI declined in 1968 and almost disappeared by 1971. The figures ranged from 96.8 percent in the North Central and Western States to 96.0 in the South.

The participation rate among women continued to be a little above that for men.

Source of Data

The HIE master file.—The data on age, sex, race and place of residence of the enrolled population in this report are from the health insurance entitlement (HIE) master file. Changes or corrections in the characteristics of the beneficiaries, new enrollments and terminations are entered into the file at periodic intervals. Data for 1971 are from the HIE master file summaried on April 1, 1972.

Place of residence.—The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIE master file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were 8,000 people with unknown residence recorded in the HIE file in 1971 (table 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly processing errors.

Race unknown.—On July 1, 1971 the number of HI enrollees without a race designation was 489,000, a decrease of 77,000 from the previous year. The number of persons classified as race unknown decreased principally as a result of race data obtained by matching Railroad Retirement Board records against Social Security Administration records. The relatively high proportion of persons without a race designation among RRB enrollees is due to unresolved data exchange procedures between the SSA and the RRB. The master records of the Board do not contain a race designation. At the start of the Medicare program and at the request of the SSA, the Board gave Medicare race information. Since then the Board has not provided the race of railroad retirement beneficiaries newly enrolled in the Medicare program. Changes in HI enrollment by type of entitlement among persons classified as race unknown between 1970 and 1971 are shown below:

[In thousands]

Type of entitlement and sex	HI enrollment		Increase, 1970-1971
	1970	1971	
Total race unknown[1]	566	489	-77
Men	182	131	-51
Women	384	358	-27
Entitled to RRB	146	95	-52
Men	94	46	-48
Women	52	48	-4
Entitled to Social Security	238	223	-15
Men	43	45	2
Women	195	178	-16
Other enrolled persons	187	172	-14
Men	45	40	-4
Women	142	132	-10

[1] Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in total.

Persons enrolled as of July 1, 1971.—Enrollment as of July 1 has been chosen as the population base for

utilization rates to be published in other sections of the annual statistical report series. The choice was based on the similarity of July 1 enrollment to a 12-month average enrollment. A comparison of HI enrollment by age, race, and sex on July 1, 1971 with an average of 12 monthly enrollment figures in 1971, computed from table 2.5, showed remarkable similarity. Less satisfactory was SMI enrollment for July, which was consistently higher than the 12-month average enrollment. This difference resulted from additions to the rolls of July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the "true" monthly average may be less than that observed in the present data.

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. The program makes available two separate but coordinated insurance coverages--hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium.

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by extended care facilities and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.[1] An exception exists under special provisions for hospitals certified to provide only emergency services.

As described in more detail below, the program is financed by a tax on a portion of current earnings and, to a certain extent, by general tax revenues.

BENEFITS

The law provides maximum limits on the benefits which may be covered under the HI program. These limits are established based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing home for 60 continuous days.

Requirements for payment by the individual of an inpatient hospital deductible and coinsurance amounts also are established by law, with the Secretary of Health, Education and Welfare authorized to set the deductible amount each year in accordance with a specified procedure. By law, the deductible amount automatically determines the coinsurance amounts for each type of service under the HI part of the program.

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private-duty nursing), drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents under approved teaching programs in a hospital.

The program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a "benefit period." Full payment is made for the first 60 days of hospitalization less the deductible of $60 for services received in benefit periods starting in 1971. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $15 a day (one-fourth of the inpatient hospital deductible).

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days, which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of $30 a day (one-half of the inpatient hospital deductible).

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services elects whether to claim payments from the Medicare program or from the beneficiary for emergency services rendered beneficiaries in a given year. If the hospital elects to bill the program, reimbursement is made under the program as described above. In other cases, the beneficiary claims direct payment and submits the itemized bill to Social Security Administration. In this case, reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

[1] For certification requirements see Social Security Administration, *Medicare: Health Insurance for the Aged, 1968, Section 3: Participating Providers* (Washington, D.C.: U.S. Government Printing Office, 1971).

Inpatient tuberculosis and psychiatric hospital services are covered as hospital insurance benefits. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement to inpatient psychiatric care in that benefit period but not from the lifetime limitation.

Extended care facility benefits.—Covered extended care services may include nursing care; bed and board; physical, occupational or speech therapy; drugs and biologicals; medical services of an intern or resident-in-training of a hospital having a transfer agreement with the extended care facility (ECF); and other necessary health care services generally provided by extended care facilities.

The program pays for the reasonable cost of all covered inpatient services in participating ECF's for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more, provided admission to an ECF occurs within 14 days of discharge. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of $7.50 a day (one-eighth of the inpatient hospital deductible) as required by law.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational, or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur in the year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered ECF stay. A home health plan must be established by the patient's physician within 14 days after the hospital or ECF discharge. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or ECF.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for monthly social security benefits. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal government from general revenues.

BENEFITS

Physicians' services covered under the program include home, hospital, and office visits. The program also pays for other services and supplies, such as: drugs and biologicals that cannot be self-administered if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment such as oxygen tents, hospital beds, and wheel-chairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ; leg, arm, back, and neck braces; artificial legs, arms and eyes, including replacement if required because of a change in the patient's physical condition; and home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

In each calendar year a deductible of $50 must be satisfied before payment may be made under the SMI program (with one exception noted below). Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count towards the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time, a "carryover" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and counted towards the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed. Hospital services incident to outpatient care, and home health services are subject to the deductible, and are reimbursed on the basis of 80 percent of reasonable costs.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness: recognition of incurred expenses is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to $250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

The hospital insurance program.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons in this age group who are entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own wage record or as a dependent or survivor of an insured worker. The provision applies, generally, to persons age 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year--six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program, retired federal employees, and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods--the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, there are general enrollment periods from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. For 1969 and later years, a person who enrolls during a general enrollment period becomes covered under SMI beginning with July 1 of the year in which he enrolls. An eligible individual must enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. Re-enrollment is allowed only once.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs or are otherwise eligible for medical assistance under Title XIX if a) prior to January 1, 1970 the State requested that a State-Federal enrollment agreement be established and b) the State pays the necessary premiums. Enrollment terminates with the beginning of the month following the month of death. Social Security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time and their coverage will be terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by witholding payment of premiums or by notifying the Social Security Administration in writing of the desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated.

Financing the Program

Hospital insurance.—The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at $6,600 for calendar year 1966; it increased to $7,800 effective with 1968 and $9,000 beginning with 1972.

The same tax rate applies to employees, employers, and self-employed persons. The rate was 0.60 percent for each year 1968-72. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in a Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The Hospital Insurance Trust Fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. For 1971, there were about one million such persons, a decrease from the 2.6 million who so qualified in 1966.

Supplementary medical insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid by the Federal Government from general revenues. Benefits and administrative costs are paid from monies in the SMI Trust Fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal Civil Service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance, and for individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of premium.—The Secetary of HEW is directed by law to determine the SMI basic premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July.

The premium rate in the first half of 1971 was $5.30 per month. The rate was raised to $5.60 effective July 1971.

Administration of the Program

Hospital insurance.—Under the hospital insurance part of the program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. The intermediary makes payments to providers for covered items and services on the basis of reasonable cost determinations and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program for physician services rendered to inpatients. In these cases, payment is made by the HI intermediary. Depending on the nature of the billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services, or are paid directly from the SMI trust fund.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payments can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary medical insurance.—Under the medical insurance program, the Secretary of Health, Education, and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carriers' principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services.

The law requires that in determining allowed (reasonable) charges, carriers should take into account the customary charges of physicians and other suppliers of medical services and the prevailing charges in the locality for similar services. The law also specifies that the allowed (reasonable) charge for a service may not exceed the charge applicable for a similar service and under comparable circumstances to the carrier's own policyholders and subscribers. The allowed charge, therefore, is a charge for a service which in the absence of unusual circumstances or medical complications is the lowest of the following: (1) the actual charge of the physician or other person rendering the service, (2) the charge the physician or other person customarily makes for similar services, (3) the prevailing charges in the locality for similar services.

Customary and prevailing charges are recalculated each fiscal year based on charges in the calendar year preceding the start of the fiscal year. Beginning January 1, 1971, the upper limit of prevailing charges was set by regulation at the 75th percentile of the customary charges (weighted by frequency) made for similar services. Thus, increases in prevailing charges recognized by

the carriers beginning in January 1971 were limited to the levels established by the 75th percentile of calendar year 1969 customary charges. Similary, increases in prevailing charges recognized by carriers beginning July 1, 1971, have been limited to the 75th percentile of calendar year 1970 customary charges.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the benefits to a physician or other supplier of services willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the $50 deductible (if applicable to the current bill).

Services furnished by group practice prepayment plans (GPPP) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Social Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

The 1967 amendments to the Social Security Act introduced a time limit on filing of claims. For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

General Tables

Notes

Health insurance for the aged.—The program, commonly known as Medicare, that pays for part of the cost of hospital and medical services for participating persons aged 65 and over.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan and a voluntary supplementary medical insurance plan.

Personal characteristics.—

Age: In completed years at last birthday on the reference month of the table. A person is considered to have attained age 65 on the day preceding his 65th birthday.

Race: White, all other races, or unknown as entered into the Health Insurance Entitlement master file from basic records completed by the primary beneficiary. Race unknown whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if either of the following pertains: (1) there were 10,000 or more enrollees of all other races in the area in the hospital insurance program on July 1, 1971 or (2) at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIE master file.

Persons ever enrolled.—All persons eligible for benefits at any time during 1971.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIE master file on April 1, 1972, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 21 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada and Virginia. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as published by the National Bureau of the Standards under the direction of the Office of Management and Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants based on the 1970 Census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIE master file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, Metropolitan SEA.—See above. Only areas in the United States are listed.

Other Data Sources on the Medicare Program

The *Health Insurance Statistics* series is designed to present current, quick-release data from the Medicare program. Two report series are issued in this format:

The *Health Insurance* (HI) series has included numerous releases since 1967. Issues released prior to 1970 are out of print, but available in many libraries.

The *Current Medicare Survey* (CMS) series, based on data from the continuing Current Medicare Survey, has also included numerous releases since 1967. These issues are available in most libraries.

Further releases in the HI and CMS series may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration, Room 1120, Universal North Bldg., 1875 Connecticut Avenue, N.W., Washington, D.C. 20009.

The *Social Security Bulletin*, published monthly, presents authoritative articles and analyses of medical care expenditures, prices, and utilization as well as current operating statistics from the Medicare program. The *Annual Statistical Supplement* to the *Bulletin* includes summary data on trust funds, services, claims, enrollment, average charges and participating providers of service under Medicare. The *Bulletin*, including the *Supplement*, is available in most libraries and by subscription at $7 a year from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The *Research and Statistics Note* series reports on-going research, preliminary findings or provides addenda to material already published on the old-age, survivors, disability, and health insurance program. Designed to get information quickly into the hands of users, the series includes data on medical care prices, outlays, and expenditures. The series is available in many libraries. Future releases may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration, Room 1120, Universal North Bldg., 1875 Connecticut Avenue, N.W., Washington, D.C. 20009.
